Moratuwa, Sri Lanka

## PROFESSIONAL SUMMARY

Results-driven final-year IT undergraduate at the University of Moratuwa, specializing in Software Engineering and Artificial Intelligence, with hands-on industry experience. Proficient in full-stack development and building scalable, maintainable systems, with a strong focus on applying AI-driven solutions to real-world problems.

## CORE SKILLS

**Programming Languages:** Python, C#, JavaScript, TypeScript
**Frameworks & Libraries:** Flask, FastAPI, PyTorch, TensorFlow, LangChain, LangGraph, PyQt6, .NET, Next.js , Node.js
**Cloud & DevOps:** AWS (Serverless, S3),Azure, Docker, CI/CD, Azure DevOps, Git
**Databases:** MSSQL, PostgreSQL, MongoDB, Redis, Pinecone, Neo4j
**Concepts:** REST APIs, Microservices,Authentication, System Design, RAG, LLMs, gRPC, WebSockets ,GraphQL
**Soft Skills:** Problem Solving, Critical Thinking, Client Engagement, Teamwork, Agile Practices, Leadership

## EXPERIENCE

**NovaCodex** Oct 2025 – Sep 2026
*Associate Software Engineer* Moratuwa, Sri Lanka

- Building payment processing platform for event ticketing and product selling with multi-gateway orchestration
- Conducting root cause analysis on ticketing system issues to identify recurring bugs, workflow bottlenecks, failures
- Tech Stack: PyTorch, GNN, TGNN, Fast API, Node.js, Next.js, AWS (Serverless, S3), MongoDB

**Creative Software** Mar 2025 – Oct 2025
*Intern Software Engineer (R&D)* Colombo, Sri Lanka

- Added GenBI using RAG to enable natural language queries and LLM-powered automated insights for DORA metrics analytical system for engineering performance, allowing teams to ask metrics questions conversationally
- Built conversational GenUI interactive chat system generating dynamic HTML components from natural language
- Explored LLM-based automation, agent architectures, and AI-driven workflows for research initiatives
- Tech Stack: Python, PyQt6, n8n, Langchain, LangGraph, Sementic kernel, Azure Devops CI/CD , ASP.NET Core

## EDUCATION

**University of Moratuwa** Jun 2022 – Jun 2026
*BSc (Hons) in Information Technology* Moratuwa, Sri Lanka

- CGPA: 3.78/4.0

**Sivali Central College** Mar 2018 – Oct 2020
*Physical Science Stream - 3A's(Combined maths, Physics, ICT)* Ratnapura, Sri Lanka

## PROJECTS

**Ontology-guided GNN for Semantic Candidate Matching** | *Lead Researcher* Mar 2026 – Jul 2026

- Designed a software industry ontology and knowledge graph schema to model fine-grained skills and semantic relations.
- Constructed a heterogeneous KG (Job, Candidate, Skill nodes) in Neo4j/RDF and implemented automated skill extraction and mapping from job descriptions and CVs.
- Implemented an interpretable rule-based Fit Score to compute job–candidate compatibility using ontology relations and generate human-readable explanations.

- Built a GNN over the ontology-guided KG to learn Job and Candidate embeddings and compute embedding similarity.
- Combined ontology-based scoring and GNN similarity to produce matched candidates
- Tech Stack: Python, Neo4j/RDF,PyTorch, PyTorch-Geometric, spaCy, pandas, scikit-learn

**Developer productivity analytical system** | *Software Engineer (Intern)* Mar 2025 – Sep 2025

- Implemented developer productivity analytics using DORA and SPACE metrics to track team performance.
- Developed interactive analytics dashboards using React and TypeScript for real-time insights.
- Integrated secure data collection and multi-platform connectivity with GitHub and Azure DevOps APIs using Python.
- Implemented CI/CD pipelines with Azure DevOps and deployments on on-premise Apache Tomcat environments.
- Tech Stack: Python, .Net core, React, TypeScript, Entity Core, MSSQL, Azure, PyQt6

**Tea Farming Support Assistant** | *AI and Fullstack developer* May 2024 – Jul 2024

- Developed a modular agent architecture with a central FastAPI service that classifies user queries using an LLM and routes them to specialized services.
- Disease Service using retrieval-augmented generation (RAG) with Pinecone vector database and web search
- Fertilize Service providing personalized recommendations using weather APIs, tea land data, historical records
- Designed a Help Service for company policy and FAQ retrieval leveraging Pinecone vector database.
- Integrated LangChain and LangGraph for agent orchestration and developed the frontend using Next.js.
- Tech Stack:Python, FastAPI, Next.js, LangChain, LangGraph, Pinecone, Scikit-learn, Pandas, DuckDuckGo

**Multi-Agent A2A System** | *AI Developer (Ongoing)* May 2026 – Present

- Designed and implemented an autonomous Agent-to-Agent (A2A) communication system enabling multiple AI agents to collaborate and exchange contextual information dynamically.
- Developed modular Host and Remote agent architectures supporting intelligent task delegation, workflow orchestration, and feedback-driven coordination.
- Implemented multi-agent communication pipelines and reasoning using CrewAI, LangGraph, and Google ADK.
- Tech Stack: Python, CrewAI, LangGraph, Google ADK, FastAPI, LangChain

**AlokanaVerse - Ticketing Platform** | *Fullstack Developer* Jan 2026 – Mar 2026

- Live :AlokanaVerse
- System for managing online event ticketing, including ticket purchasing, product sales, and secure payment processing via Koko and OnePay.
- Developed features for digital ticket generation with email delivery and QR code-based validation for event entry.
- Implemented AWS serverless architecture with schedulers to handle automated tasks and system scalability.
- Tech Stack: React, Node js, Aws, MongoDb

**LevoHub - Construction workflow management** | *Fullstack Developer* Jan 2026 – Mar 2026

- Client: levo construction
- System to manage construction workflows, including project tracking, time management, and team coordination
- Implemented role-based access control (RBAC) to handle user roles and permissions for structured operations.
- Developed workflow tracking and real-time notification features to improve task visibility and team communication.
- Built project management and employee time tracking modules to monitor progress and resource utilization.
- Developed a Progressive Web Application (PWA) to enable mobile access for employees
- Tech Stack: .Net core, React, TypeScript, Entity Core, PostgressSql

## ACHIEVEMENTS

HackX - University of Kelaniya Finalist (Top 10)

SLIOT - University of Moratuwa Finalist (Top 10)

## CERTIFICATES

Azure Fundamentals (AZ - 900)

AI Agents Using RAG

Gen AI with Transformers
